

# Interxion Secure Data Service

## Backup and Restore

### Value for money

- No capital outlay, payments on a monthly basis
- No license fees
- No tape storage cost or tape transport costs
- Pay for only the data stored - pay as you grow
- Minimal staff time needed for data back up and recovery
- Performance guarantees
- Low total cost of ownership

### Efficient

- Set up and installation is simple and complete within minutes
- Encrypted data is immediately stored at a remote secure datacentre
- Near instant recovery of data
- Pre-scheduled automated incremental back up
- Daily/hourly automated incremental back up
- Multiple versions backed up, ensuring fine grain protection
- Common file elimination and Delta blocking minimise back up window

### Added Security

- Data removed instantly to a high availability Vault located at Interxion data center
- Customer generated key provides up to 256 bit AES encryption
- Customer encryption key is only known/held by the customer
